Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference character(s) mentioned in the description: 78 and 67. Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities: on page 3, line 25 and page 4, line 3, reference numeral "78" is not labeled in the drawings; page 3, line 26, reference numeral "67" is not found in the drawings.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1,3,7,9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Peccoux 5,503,440.

The embodiment as shown in Fig. 7D (col. 8, lines 22-25; col. 9, lines 12-13) clearly teaches a safe comprising a strip of tongues/catch fingers 26;262 on the door edge to engage with a slotted latch bar/plate 8/10 mounted to the safe side walls with main bolts 20,21 to engage the fingers when the door is closed, and upon movement of the latch bar/plate, engage the locking slots to lock the door within the enclosure jamb. Peccoux further teaches a lock bolt 50a which locks the latch bar/plate.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3676

6. Claims 13,14,19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Peccoux '440 in view of Link 4,370,935.

Link teaches mounting safe to the studs within a wall. It would have been obvious to one of ordinary skill in the art to modify the safe of Peccoux by providing a wall mounting directly fastened to the studs as taught by Link as an obvious matter of design choice in utilizing the existing wall structure to conceal the safe.

Allowable Subject Matter

7. Claims 2,4-6,8,10-12,15-18,20,21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the door stop chain of Schattner '967; the latch fingers of Chapron et al '168, Muller '167, Blomquist '873 with reversed parts having the fingers on the safe wall and the latch plate on the door.
